Brady Workstation

Simple. Efficient. Flexible.

Brady Workstation

Get more done faster with simple labeling software apps.

The latest in label creation software, Brady Workstation has revolutionized how you design and print labels and signs. Simply pick the apps you need to get the job done, and enjoy the benefits of simple, efficient and flexible label creation.

Simple.

Brady Workstation offers an intuitive user interface and workflow so that you're ready to get started, without needing in-depth training. Download Brady Workstation at Workstation.BradyID.com, find the apps your want, and you're ready to create labels and print them on your Brady printer.

Efficient.

Each app is designed with you in mind, featuring built-in regulations, standards, pictograms, common phrases, data importation guidance, help functions and more. That means you can create signs, pipe markers, lockout procedures, labels and more – with time to spare for the other tasks on your list.

Flexible.

With over 20 app options, and more continually being developed, you have the tools you need to create labels for nearly any application. Fill out your workstation to align with your exact needs by downloading the apps you need and leaving out the ones you don't.

Brady Workstation Suites

Get the right suite of labeling solutions for your application needs:

Automation Suite

Get the power to fully automate your label printing with the Brady Workstation Automation Suite. After a few easy setup and template creation steps, you're ready for automated label printing - helping to eliminate errors and ensure label layout and format consistency.

Apps included: Custom Designer, Data Automation, Manage Files, Template Editor and Label Settings.

Basic Design Suite

Get everything you need to create your own custom labels with the Brady Workstation Basic Design Suite. With basic design, formatting, graphics and simple barcode libraries, you can design labels like a pro in no time.

Apps included: Batch Print, Excel Import, Manage Files, Sequence, Template Editor, Label Settings and Custom Designer Lite.

LabelMark Upgrade Suite

When you're ready to step up to Brady Workstation from LabelMark software, the LabelMark Upgrade collection of apps includes everything you need for the transition. You can design basic text labels or labels with advanced formatting, add graphics and barcodes, serialize and import data, and more.

Apps included: Advanced Import, Advanced Sequence, Batch Print, Custom Designer, Excel Import, Flip Flop, Manage Files, Print Partner, Sequence, Template Editor, Text Labels and Label Settings.

Print Partner Suite

Print Partner Suite includes everything you need to fill in your templates and print, including importing data from a variety of supported data sources or automatically generating sequential data for your labels.

Apps included: Advanced Import, Advanced Sequence, Excel Import, Manage Files, Print Partner and Sequence.

Product & Wire Identification Suite

When you need to create product identification and wire marking labels, the Product and Wire Identification Suite is your go-to solution. It allows you to create basic text labels or labels with graphics and custom formatting, and serialize and import data. If you need to create labels for your product or wires and cables, this is the suite for you!

Apps included: Advanced Import, Advanced Sequence, Batch Print, Custom Designer, Excel Import, Flip Flop, Manage Files, Print Partner, Sequence, Template Editor, Text Labels and Label Settings.

Product Identification Suite

When you need labels to identify your products, look no further than the Product Identification Suite. This collection allows you to design customized labels with graphics, advanced formatting, barcodes, serialization and importing of data. If your product needs to have a label on it, this is the suite for you!

Apps included: Advanced Import, Advanced Sequence, Batch Print, Custom Designer, Excel Import, Manage Files, Print Partner, Sequence, Template Editor and Label Settings.

Safety & Facility Identification Suite

Keep your facility safe and compliant with the Safety & Facility Identification Suite. This group of apps makes it easy to create custom signs, labels and pipemarkers. If you are looking to add visual safety guidance to your facility, this is the suite for you!

Apps included: Arrow Tape, Batch Print, Custom Designer, Excel Import, Express Signs, Manage Files, Pipemarker, Print Partner, Sequence, Template Editor and Label Settings.

Wire Identification Suite

For creating wire and cable labels, the Wire Identification Suite includes the right mix of Brady Workstation apps. It allows you to easily create single line labels, labels with wrapping text, and the serialization and importing of data without having to worry about alignment. If you are labeling or wrapping wires and cables, this is the suite for you!

Apps included: Advanced Import, Advanced Sequence, Batch Print, Excel Import, Flip Flop, Manage Files, Print Partner, Sequence, Template Editor, Text Labels and Label Settings.

Brady Workstation Apps

Find what you need to get your labeling job done quickly and effectively:

Arc Flash

Quickly and easily create NFPA compliant arc flash labels with the Arc Flash app. Enter or import the assessment data for your equipment, then use the built-in templates to create and print your labels within a few simple clicks. This includes the latest 2015 updates to the NFPA 70E standard.

Express Signs

Create your signs in no time! With the Express Signs app, simply pick a template, enter your information and print it in minutes. Want to try a different look? With just a single click, you can pick another layout - and don't worry, the sign information you entered will stay the same.

GHS Labels

Creating GHS labels is now surprisingly simple. We've streamlined the process so you can easily enter the data from your SDS sheets once, then create and print any size GHS label at any time. Need Bi-lingual labels? Those are also supported in the app.

Lockout Writer

Save time and keep employees safe with the Lockout Writer app. This intuitive tool allows you to create, store and print simple lockout procedures, associated tags and energy source labels quickly and easily.

Arrow Tape

Beyond creating a compliant pipe marker, you need to know what direction the pipe contents are flowing. The Arrow Tape app uses predefined templates and layouts to help you create a strip of repeating arrows or icons to wrap around your pipe, showing content direction.

Pipemarker

Complying with the ANSI/ASME 13.1 2007 pipe marking standard just got easier. The Pipemarker app allows you to create the customized pipe markers you need using predefined pipemarker templates. When finished, you can save them to use again when you want more. Still following the 1996 version of the standard? The app supports that too.

Custom Designer

When you need full label creation capabilities to streamline your work and maximize your investment, Custom Designer is the app of choice. This premier label editing app includes all of the features of Custom Designer Lite, plus more barcodes, linked objects, label error checking, subscript/superscript, advanced editing tools and more. It also opens saved "graphics mode" files from LabelMark 5 and 6 without the need to convert.

Custom Designer Lite

When all you need is a simple label editor to add text, barcodes, graphics and shapes to your labels, Custom Designer Lite is the ideal tool. This "no frills" label editing app also lets you customize labels created in any other Brady Workstation app.

Text Labels

When you need just a few lines of text for a wire or cable marker, the Text Labels app provides a simple, streamlined experience. It enables you to easily enter text and shows you how many lines of text will fit onto your label. If you have saved "line mode" files from LabelMark 5 and 6, this app fully supports opening them, with no conversion required.

Data Automation

Save time and reduce errors with Data Automation. By automatically importing data onto a pre-defined label template and printing to a designated printer, this app allows label printing to seamlessly become a part of your daily processes. It runs in the background so you won't have to interrupt your work just to print a label.

Print Ruler

Print a simple ruler that you can apply when and where you need it. "Brady Labs" are experimental apps or features not ready for full release. Test them out for us, then let us know what you think!

Advanced Import

When you need data import capabilities beyond Excel, use the Advanced Import add-on module. It creates a separate label for each item in the source data imported from .CSV, .TXT, Excel, MS Access, OLE DB and SQL. In addition, you can filter and sort, edit your SQL query or select individual records to import. This module works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.

Advanced Sequence

Define a sequence with multiple counters and create a separate label for each value in the sequence with the Advanced Sequence add-on module. You can set each counter to increment independently or after a different counter has finished. It works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.

Excel Import

The Excel Import add-on module lets you import Excel data onto your labels, creating a separate label for each row in your spreadsheet. It supports both .xls and .xlsx formats, and works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.

Sequence

With the Sequence add-on module, you can create a separate label for each value in a numeric or alphanumeric sequence. The sequence is defined by setting the starting number, total number of labels and increment interval. It works with Custom Designer, Custom Designer Lite, Text Labels and Print Partner apps.

Template Editor

For more consistent, accurate labels, the Template Editor add-on module available in Custom Designer, Custom Designer Lite, and Text Labels editor apps allows you to set elements on your labels to be editable or locked. Once completed, your finished templates can be used in Print Partner or Data Automation apps to easily enter data onto your labels.

Flip Flop

Automatically swap text items horizontally or vertically on your labels with the Flip Flop add-on module. This is especially useful for DataComm applications when you just need to reorder your data. It works with Custom Designer, Custom Designer Lite and Text Labels apps.

Batch Print

The Batch Print app is your one-stop shop for grouping files to print together. By batching similar files together to print as one job, you can save ribbon and tape materials. And if you need to print the same files again and again, you can save your jobs for faster reprints.

Label Settings

Save time and reduce errors by setting default horizontal and vertical printing adjustments when using specific label supplies with a specific printer. The Label Settings app also allows you to define custom label supplies for use with Brady Workstation, similar to the "Custom Parts" feature in LabelMark.

Manage Files

Need to see and organize your label files from all of your apps in one place? The Manage Files app lets you manage all of your saved files from one screen, with options to preview, categorize and delete your files without going into each app separately.

Print Partner

Save time, reduce errors and establish label consistency with the Print Partner app. Non-editable fields keep label layouts and information safe, while users can easily enter data into variable fields and then print. This app works with both Brady Workstation and LabelMark templates.

LabelMark 4 Converter

Do you have LabelMark 4 files? The LabelMark 4 Converter does just what it says - converts your files for use in Brady Workstation. You can convert a single file or all files in a single folder at once. (You do NOT need this utility for files from LabelMark 5 or 6, as these files can be directly opened within Custom Designer, Custom Designer Pro or Text Labels without needing to convert).

Get Brady Workstation Today!

1. Download Brady Workstation at **Workstation.BradyID.com**

2. Fill the workstation with the apps you want and leave out the ones you don't.

3. Save time by quickly designing labels and printing them on your Brady printer.
